ASX/MEDIA RELEASE

COMPANY UPDATE

Azurn International Limited (ASX: AZU) is pleased to announce that the Company has entered into a Memorandum of Understanding (MOU) with ThorSol Pty Ltd (Thorsol) (ACN 127 715 904) in relation to a Digital Interactive Systems Business Alliance.

The MOU covers the following key areas of business collaboration which is not exhaustive. Other announcements will be made as the relationship progresses. Under this MOU Thorsol has agreed to :

- Distribute Azurn products and technologies into selective markets accessible to Thorsol that do not conflict with any existing Azurn distribution agreements. Areas under consideration include the Middle East and Africa (including MENA Region)
- Licence Azurn products and technologies to Thorsol for exploitation , principally by integration into Thorsol technology platforms
- Develop new Azurn products by Thorsol's R&D business arm Thorsol Technologies Pty Ltd (ACN 109 543 508)
- Outsource part of Azurn's R&D activities to Thorsol
- Create a number of focused joint venture business initiatives
- Provide financial packaging by Thorsol of Azurn's products for professional markets including education and Telco providers in Australia and Internationally

About Azurn International Limited

Azurn International is a global provider of business solutions that boost efficiency in workplace, customer service and educational environments. The company's core capabilities lie in communication and online publishing technologies. The Company's publishing technology enables large volumes of printed material to be converted to XML for online distribution and access. The company's patented communication technologies seamlessly combine a wide range of voice, data and video sources that enable real time multi-party interactivity.

Whilst Azurn has many projects underway, two large projects include:

LARGE SCALE EDUCATION ENABLEMENT:
Azurn is working on a project with Hughes Communications to connect 30,000 points of presence in India – every point of presence can cater between 10 to 100 students. Interactively, the solution can deliver any academic course and corporate training classes from anywhere in the world to this connected community. The relationship we have in India with Hughes will be extended to cover several other countries. Through a

revenue share model, Azurn annually could expect to earn approximately $100 per student seat from within each point of presence.

CONNECTING PEOPLE-AT-WORK:
Azurn has established revenue share reseller relationships in UK/Europe, India and Australia. Azurn is now setting up facilities that will allow in excess of 900 people-at-work (in groups of three or more across several simultaneous sessions) to "interact" with each other at any given time within the SME markets of these geographies. Easy to provide and convenient to use, these interactions will enable people at work, within the SME sector to chat, talk and share information in real time using whatever devices they already have. Today, such high end interactions (quality of service guaranteed) delivered through carriers cost the end-user AU$0.50+ per person, per minute.

Headquartered in Melbourne, Australia, Azurn has a direct presence in five markets – Australia, Singapore, India, USA and the UK, and operates world-class development centres in Bangalore, Pune and Coimbatore in India. The Company has over 370 employees worldwide.
